On some Sprinter chassis the storage compartment in the right step well must be removed to allow jacks to be installed.

1. Remove screws, lift out plastic step well liner and storage compartment door.

2. Remove screws from inside of storage compartment and remove storage compartment door. (Storage compartment will not be reinstalled)

3. Apply a bead of sealant around the compartment opening.

4. Place aluminum plate over opening and screw into place using self drilling screws.

5. Reinstall step well cover and storage compartment door.

CAUTION: Follow CAUTIONS in Operator’s and Installation Manuals concerning working under vehicles.
