

The HWH SpaceMaker™: Single Cylinder Room Extension.

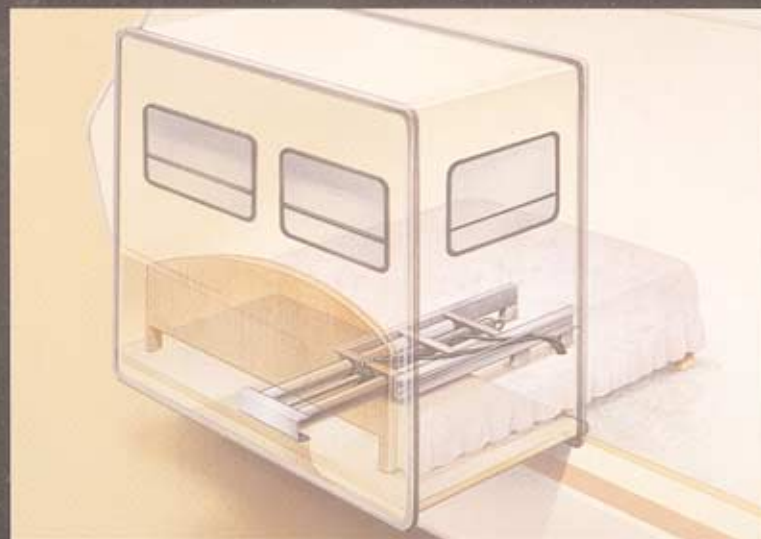

For more than two decades, HWH leveling systems have been the measure of our success. Now there's another: SpaceMaker™, our advanced hydraulic room extension. It's a totally flexible extension that increases the size of a room by up to 34 inches. When used in bedrooms, the extension mechanism is located under the bed providing under floor storage space. When used in living rooms, dining rooms and galleys, the extension mechanism is located under the floor.

HWH extension hydraulics offer precise compression on the room seals so that our room extension closes firmly and securely. Engineered plastic slide bearings eliminate the need for messy lubricants, ensuring smooth operation. And the cylinder stroke can be adjusted in either direction so our room extension continues to seal over time.

Like HWH leveling systems, you'll find technology-driven engineering and high quality materials. No wonder our room extensions and levelers are the right combination. For reliability and durability, depend on HWH. No one else measures up.

HWH's unique SpaceMaker single cylinder room extension increases the size of a room by up to 34 inches.

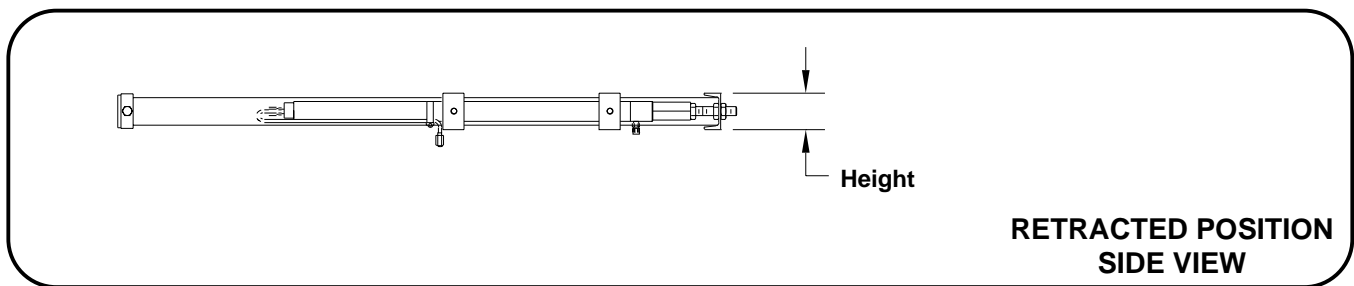

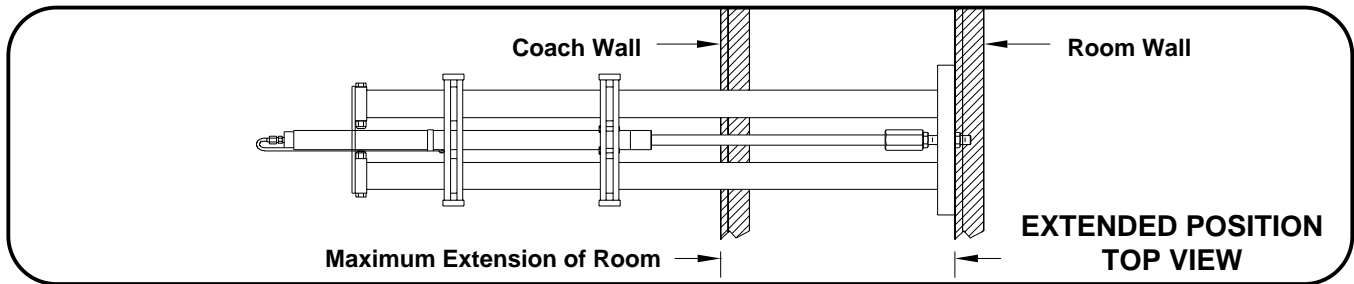

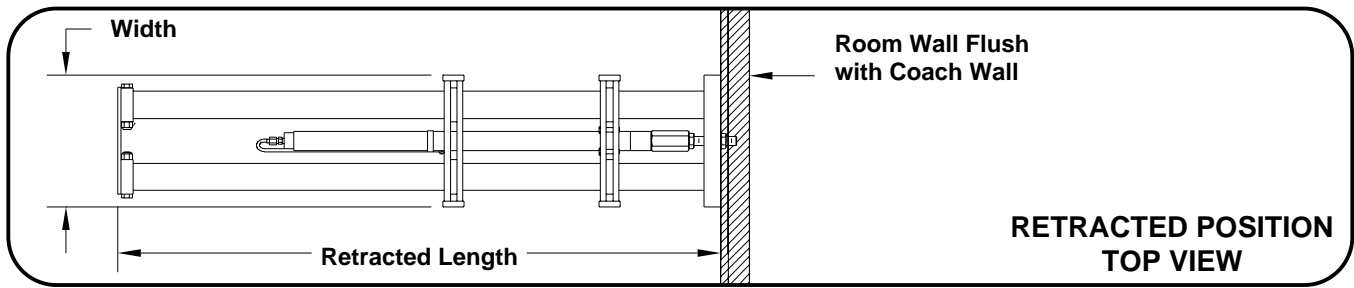

The fit that performs.™
