HYDRAULIC HOSE / FITTINGS / SWAGING GUIDE

NOTICE: Hose and fittings must be matched as listed below and swaged with the listed die and pusher and a TS5046 swaging tool. See page MR75.1000 for swaging tool. Read numbers on parts carefully. The complete "Print on Hose" and "Number on Part" as listed below must be on the respective hose, fitting, die or pusher for proper identification. There will often be additional suffix letters, lot numbers or date codes on the components also.

- STEP 1.** Read the printing on the hose cover to determine which of the following hoses you have.
STEP 2. Select the required hose end.
STEP 3. Select the required Die and Pusher.
