HWH Dual Cylinder “Universal” Room Extension* is designed to simplify installation. New exclusive HWH Inter-Locking Chains* are used to extend and retract the room. The room floor is flush with the coach floor when the room is extended. Plus provides the coach owner with a clean exterior finish.

Features and Benefits

- Above-floor mounting eliminates the loss of valuable under-floor space. NOTE: “Universal” LO utilizes lift cylinders which are mounted below-floor using minimal below-floor space.
- A heavy-duty room extension system for rooms up to 3,000 pounds.
- Movable room storage compartments - No more crawling under room to gain access!
- The room floor is suspended which eliminates the possibility of damage to the coach floor coverings.
- The Dual Cylinder “Universal” slide utilizes a four-point attachment, which draws all four corners in for a positive seal whether the room is extended or retracted.
- The HWH Synchronizing Cylinders allow for smooth, even extension and retraction of the room.
- No exposed hardware when the room is extended. The exteriors of the room and the coach have a clean-finished appearance.
- Ideal for use on galley and living rooms.
- The mechanism is easily operated with the use of a momentary switch.
